

EdLeaderAI

A library of 60 AI workflows built specifically for school leaders. Not a prompt list. Each one is a complete, step-by-step play you run start to finish, built by a former superintendent who did these jobs for real.

60 workflows across seven leadership areas · built for Claude Cowork, also available for ChatGPT and Codex · runs on the standard \$20/month plan

What It Is

Each workflow walks you through the whole task the way you would actually do it: what to gather, what to ask, how to check the output, how to turn it into something board-ready or staff-ready. Built for Claude Cowork, and also available for ChatGPT and Codex. It runs on the standard \$20 per month Claude or ChatGPT plan. No enterprise contract required.

The “Make It a Skill” Idea

WHY THIS IS DIFFERENT

The workshop showed the difference between asking AI for a one-off answer and giving it a repeatable play it runs the same way every time. That is what these are. You are not starting from a blank prompt every Monday. The recurring work becomes a skill your team reuses.

Try three free. Three complete workflows are free at edleaderai.com. Run them on real work before you spend a dollar.

NO STUDENT PII BY DESIGN

The workflows use aggregate data, frameworks, and templates. Nothing asks you to put a student record into a chatbot.

Pricing

ITEM	PRICE
Single workflow	\$19
Category bundle	\$79 to \$179
Context Setup Pack	\$29
Full Pack (all 60 + Context Setup)	\$699

The Full Pack is the serious option for a leadership team that wants the whole library working across the cabinet. Districts can also get the full library included with the \$1,500 Leadership Team AI Setup Session, which comes with a district invoice and W-9 and is Title II eligible.
